

BookData Website Enrichment Service

Enhance your website with images and descriptive content using the BookData Website Enrichment Service. This service provides over 4.3 million jacket/cover images and over 11 million title records, including descriptions and tables of contents for UK, in-print, out-of-print and forthcoming titles – designed to make your website more appealing to your customers.

We offer timely, accurate and comprehensive coverage for English-language books published worldwide and work with publishers in the key English-speaking territories: UK, Ireland, Europe, Australia, New Zealand and South Africa. We also work with the leading data suppliers in the US and collect book information from a further 70 countries. By working with publishers large and small we ensure the broadest title coverage and to ensure there is no duplication, our records are presented in a concise manner – each record carries all territorial and pricing information for each market under one unique ISBN.

Our BookData Website Enrichment Service is supplied in a tailored and easy-to-manage format according to your requirements and we offer a range of key criteria for the selection of records including by classification: BIC Subject Classifications, BookScan Product Classes, readership levels and genre headings. You can also specify the depth of detail you require.

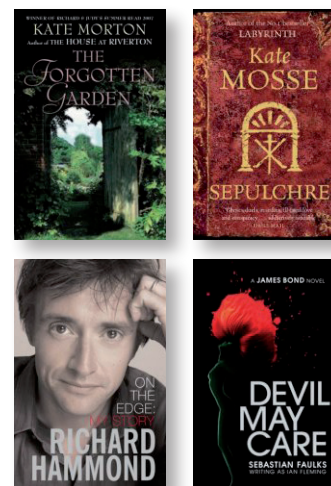

How can you use the Website Enrichment Service?

- Enhance your website to sell books (print and digital), videos, audio tapes and CDs & DVDs over the internet
